

LK-M280-5T Single Door EM Lock

Single Door Electromagnetic Lock | Access Control Security

Product Overview

The **LK-M280-5T** is a **single-door electromagnetic (EM) lock** from LOKIZ, designed for controlled door access applications. The lock is intended to work as part of an access control installation, where an authorized access signal releases the electromagnetic locking mechanism. LOKIZ positions its magnetic and EM lock range for commercial and residential access control environments and integration with access control technologies.

Key Features

- **Single-Door Configuration:** Designed for single-door access applications.
- **Electromagnetic Lock:** Provides electrically controlled door locking.
- **Access Control Integration:** Suitable for use within professional door access control systems.
- **Professional Security Hardware:** Part of the LOKIZ magnetic lock and access control product range.
- **Commercial & Residential Use:** Suitable for controlled-entry environments.
- **Clean Metal Construction:** The supplied product image shows a compact metal lock body and armature plate.

Product Description
