

LK-SL02C-NC Long Type Electric Strike

NC Fail Secure | 500kg Holding Force | Dual Voltage Support

Product Overview

The **LK-SL02C-NC** is a long-type electric strike designed for professional door access control applications. The supplied product information identifies it as an **NC Fail Secure** electric strike with a **500kg holding force** and **dual voltage support**. Its long-type construction is designed for durable, smooth operation and compatibility with suitable doors and access control systems.

- Key Features**
- **NC Fail Secure Mode:** Designed for fail-secure access control operation.
 - **500kg Holding Force:** Provides strong holding performance according to the supplied product information.
 - **Dual Voltage Support:** Supports dual-voltage operation as specified for the product.
 - **Durable Construction:** Built for reliable long-term use.
 - **Long-Type Design:** Extended strike body for suitable door installations.
 - **Smooth Operation:** Designed for dependable door release operation.
 - **Access Control Ready:** Suitable for integration with access control systems.
 - **Door Compatibility:** Designed for compatible door access applications.

Product Description

Specification	Details
Model	LK-SL02C-NC-LONG-TYPE-ELECTRIC-STRIKE
Product Name	Long Type Electric Strike
Brand	LOKIZ
Strike Type	Electric Strike
Lock Mode	NC Fail Secure
Holding Force	500kg
Voltage	Dual Voltage Support
Design	Long Type
Construction	Durable Construction
Operation	Smooth Operation
Application	Access Control Systems
Door Compatibility	Suitable Compatible Doors
